- Supply Chain

One of our proud references

We were in an urgent need to find a Senior Account Manager Savoury for Northern Europe. Therefore, we reached out to QTC Recruitment to fill this position swiftly. In close collaboration with the talent acquisition department the hard-to-fill position was explained to QTC.

After two weeks, we received a selection of three relevant and experienced candidates within the agreed time-frame. This selection perfectly matched our expectations and the

candidates were all invited for first and final interviews. The manager was pleasantly surprised by the quality of the candidates. Due to the work QTC Recruitment did for us and their specialised network within the food sciences industry, we were able to hire the number one candidate within five weeks.

Talent Acquisition Business Partner
Global functional food production company

Hans Dijkstra, Managing Partner

"Nowadays, the food industry is rapidly changing because of higher needs for more nutritious food in regions with less available food. One of the companies we work for has developed a more nutritional rice grain. I'm proud that we, as QTC Recruitment, support these companies inventing life improving products and make these companies more successful by finding the right specialists to employ"
